Profile

Django Backend Developer with 2.5+ years of professional experience building REST APIs, multi-tenant applications, payment integrations, and database-driven systems. Experienced in Python, Django, Django REST Framework, PHP, Laravel, PostgreSQL, MySQL, authentication systems, and performance optimization. Passionate about designing scalable backend architectures and delivering reliable production-ready applications.

Key Achievements

- Reduced database query response time from 13s to 2s on 200K+ records.
- Integrated Stripe recurring subscriptions with automated billing workflows.
- Built scalable REST APIs using Django REST Framework and Laravel.
- Implemented Progressive Web App (PWA) offline support using Service Workers to enhance user experience
- Developed real-time chat functionality using WebSockets and Laravel Reverb.
- Automated recurring tasks using Laravel Scheduler.
- Implemented PWA offline support using Service Workers.
- Designed role-based access control (RBAC) and multi-tenant architectures.

Experience

Full Stack PHP Software Developer, Fitlynk	2023 - 2025
• Developed and maintained REST APIs powering e-commerce and booking platforms. • Reduced database response time from 13s to 2s through query optimization, indexing across 200K+ records. • Integrated Stripe subscription billing with secure webhook processing and automated payment workflows. • Designed backend business logic for booking workflows and user account systems.	

Project

University Routine Management System (Django, DRF, Vue.js)
• Designed REST APIs for timetable generation and management. • Implemented conflict detection for classrooms, teachers, and schedules. • Developed JWT authentication and role-based authorization system. • Built multi-tenant architecture supporting multiple departments • Integrated AI-assisted routine generation from uploaded PDF schedules.
LiveChat Platform (Laravel 13, Redis, Reverb, MySQL)
• Engineered a scalable real-time collaboration platform with messaging and approval workflows. • Built secure REST APIs and role-based access control (RBAC). • Optimized backend performance using Redis caching, queues, and WebSocket broadcasting. • Designed relational database architecture for scalable collaboration features.
MedibazarBD – E-commerce Platform (Laravel, MySQL, VueJS)
• Developed scalable REST APIs with Laravel powering a Vue.js admin panel. • Implemented asynchronous jobs using Laravel Queue for image optimization and email notifications. • Built SEO-friendly image processing and responsive user/admin interfaces.
Multi-Vendor Ecommerce Platform (PHP, MySQL)
• Built a multi-vendor e-commerce platform with payment integration and CMS features. • Developed authentication and order management modules. • Implemented payment gateway integration and CMS functionality.

Tools and Technology

Backend	• Python, Django, DRF, FastApi, PHP, Laravel	Database	• MySQL, Redis, PostGreSql
Frontend	• Vue.js, JavaScript, TailwindCSS	Tools	• Git, Postman, DigitalOcean, WebSockets

Certifications

LEDP - Learning and earning developemrnt project - ICT

Education

Diploma in Computer Technology, Rajshahi Polytechnic institute	2018 - 2023
